15

The preliminary amendment of 5/21/01 has been entered. The amendment amended claims 1, 3-8 and 11-15, and added new claims 16-20.

Claims in the application are 1-20.

The drawings filed 9/27/01 have been approved by the draftsperson.

Election/Restriction

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-10, 13 and 14, drawn to a method of coating a cell with a thin coating of hydrocolloid, wherein after applying the thin coating the coating is crosslinked, classified in class 435, subclass 382.
- II. Claims 12, 16 and 17, drawn to a method of postponing hatching of <u>Xenopus laevis</u> embryos by applying a thin coating of hydrocolloid to a <u>Xenopus laevis</u> egg and crosslinking the coating, classified in class 424, subclass 400.
- III. Claims 15 and 18-20, drawn to a cell having a thin coating of hydrocolloid, classified in class 435, subclass 178.

The inventions are distinct, each from the other because:

The method of coating a cell I does not have to be carried out in a

20 method of postponing hatching as required by the method of II, and
coating in the method of II can be performed other than as required by
the method of I. For example, the method of coating of I can be used to
coat a cell to protect the cell during use or storage and not to postpone
hatching, and in the method of II the hydrocolloid can be sprayed onto

25 the egg rather than placing the egg in a solution of hydrocolloid and

Art Unit: 1651

15

then removing the egg from the solution before crosslinking as required in the method of I. The coated cell of III can be produced by a method other than required by the methods of I and II since the thin coating on the coated cell of III does not have to be crosslinked, and the coated cell of III does not have to be produced when postponing hatching as in II, and the coating can be sprayed on the cell without performing the steps of I. Inventions I, II and III can each be carried out separately using different steps to provide a different end result.

Because these inventions are distinct for the reasons given above 0 and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application.

20 Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to David M. Naff whose telephone number is (703) 308-0520. The examiner can normally be reached on

Monday-Thursday and every other Friday from about 8:30 AM to about 6:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, a message can be left on voice mail.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mike Wityshyn, can be reached at telephone number (703) 308-4743.

The fax phone number is (703) 872-9306 before final rejection or (703) 872-9307 after final rejection.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (703) 308-0196.
